

POWER YOU CAN TRUST

CRITICAL POWER & GENERATOR SPECIALISTS

CONTINUING PROFESSIONAL DEVELOPMENT (CPD)

Outline Syllabus for "Generator Selection"

This seminar focuses on many of the essential aspects of correctly sizing a diesel generator. In addition it provides a general overview on acoustic and fuel system requirements essential for the successful completion of your diesel generator installation.

CPD SEMINARS

Generator Selection (ISO8528-5)

1 Hour

Ratings

Performance Classes

Transient response (voltage and frequency)

Load profile analysis

Matching generator performance to load

Fuel System Basics

30 mins

DEFRA

System design

Storage capacity and options

Transfer system and distribution

30 mins

Acoustics

Basics of noise

Sound Power / Sound Pressure

Attenuation and mitigation

Generator Maintenance

30 mins

Emissions

Medium Plant Combustion Directive

Emission reduction

Flue Systems

Q&A

This seminars focus on many of the essential aspects of correctly sizing a diesel generator. In addition it provides a general overview on acoustic and fuel system requirements essential for the successful completion of your diesel generator installation.
